Accounting Systems & Operations Support

Through our QuickBooks® and Small Business Accounting group, BIK & CO provides an easy way of managing accounting and reporting. We can provide a turnkey accounting system, help refine or troubleshoot an existing QuickBooks® installation, and train employees how to use your system. You do not have to be a QuickBooks® expert. Most clients get comfortable using basic functions and then require a few specialized features to better manage cash billing, receivables, payables and create reports that contain the information needed to manage the business.

We have CPAs and Certified QuickBooks® ProAdvisors on staff. Our ProAdvisors have undergone extensive training in the use of QuickBooks®, QuickBooks® Enterprise and QuickBooks® Point of Sale products. We are an accounting firm with software specialists on staff, making it easy to obtain comprehensive support. Whether installing or maintaining your accounting system or requiring advice on how to handle a transaction, BIK will provide a qualified professional.

Another option for some clients is to outsource their accounting to BIK. Depending on the size of your business and the complexity involved, outsourcing may be a more affordable, efficient use of resources.

Good information starts with your accounting system. Our end goal is to provide you with the necessary information required to manage your business.
